

Figure 1 consists of ten panels (a-j) showing the relationship between the 1997-1998 El Niño index and tree growth. Each panel includes a scatter plot of tree growth (cm) versus the 1997-1998 El Niño index, with a regression line and a p-value. The panels are arranged in two columns of five. The left column (a-e) shows data for trees with a diameter at breast height (DBH) of 10 cm, and the right column (f-j) shows data for trees with a DBH of 15 cm. The top row (a, f) shows data for trees with a height of 10 m, and the bottom row (e, j) shows data for trees with a height of 15 m. The panels show a significant positive correlation between the 1997-1998 El Niño index and tree growth in all cases.
